8.5. International Standards	17
8.6. Guidance Notes and Publications	18

1. Scope

This Guideline covers the requirements associated with the disposal of wastes generated by the Company's operation. It includes handling of wastes and transport of wastes (including by contractors).

For general issues related to waste management, refer ES&H Guideline [ESH-063](#).
For issues related to waste treatment, refer ES&H Guideline [ESH-066](#).

2. Objectives

To ensure that waste disposal is carried out so as to minimise impact on the environment and the safety and health of personnel and others who may be exposed to hazardous waste.

3. Definitions

PIW

Prescribed Industrial Waste – i.e. hazardous wastes, and wastes that can affect amenity (e.g. odour), generated by industry and listed in relevant legislation (e.g. Prescribed Waste Regulations).

4. Issues to be Addressed

Please Note

This section of the ES&H Guideline needs to be expanded and further developed by users into a full operational procedure. This is done by incorporating details to reflect your company's structure, work process and local circumstances; legislative and other requirements; and technical details from publications and guidance notes. Assistance with developing procedures is available from Management Systems Australia.

The major issues addressed in this guideline are as follows:

4.1. Handling of Wastes

The handling of wastes which are hazardous substances, shall be in accordance with ES&H Guideline [ESH-024](#).

Material Safety Data Sheets shall be available to all personnel dealing with, or exposed to, waste. Refer ES&H Guideline [ESH-023](#).

4.2. Transport of Wastes

Transport of waste for off-site disposal shall be in accordance with ES&H Guideline [ESH-055](#).

Contractors used for the transport or disposal of waste shall be qualified and, where applicable, licensed. Refer ES&H Guideline [ESH-022](#).

To ensure waste taken by contractors is properly disposed of, and to avoid liability for negligent discharge which may harm the environment, arrangements shall be put in place to ensure that the written agreement with the contractor includes at least the following:

- Specific instructions that the waste must be transported, treated and disposed of in a way that complies with all applicable legislation and does not harm the environment.
- Transfer of ownership of the waste from the Company to the contractor.
- Evidence by the contractor that it possesses all the necessary licences and that the persons who carry out the work are qualified and experienced.
- Requirement for the immediate notification of spills, leaks or any other uncontrolled discharges or accidents.

In addition, the Carrier shall be fully informed about the waste handed over and in all such instances, a receipt for the waste shall be obtained from the driver and kept for at least three years.

In Queensland Regulated Waste shall only be transported in suitably designed vehicles, tanks, containers or secondary containers that are appropriate for containing the waste being transported. The design shall take into account at least the following matters:

- the relevant design requirements prescribed in Schedule 8 of the Queensland Environmental Protection (Waste Management) Regulation 2000;
- the corrosive nature of the waste being transported (e.g. acid waste must be transported in acid resistant containers);
- the physical state of the waste (e.g. liquids should only be transported in drums, tanks or tankers);
- the requirements outlined in the ADG Code; and
- any relevant Australian Standards.

In addition, all such vehicles, tanks, containers and secondary containers shall be maintained in a good condition at all times to prevent any spillage or leakage of regulated waste or other contaminants, and shall be kept free of regulated waste residues when not in use. A solid impervious partition shall be provided to separate the load compartment or area of the regulated waste transport vehicle from the driver's compartment.

4.3. Incidents and Emergencies

All transport incidents shall be immediately reported and be the subject of an investigation and corrective action (refer ES&H Guidelines [ESH-006](#) and [ESH-005](#)).

For transport emergencies, involving waste shipped from site, refer ES&H Guideline [ESH-015](#).

For prevention and control of transport spills, refer ES&H Guideline [ESH-110](#).

4.4. Used Packaging Materials

For requirements related to the disposal of used packaging materials of the Company's own products, refer ES&H Guideline [ESH-020](#). For other used packaging materials, refer ES&H Guideline [ESH-054](#).

4.5. Waste Discharges to the Environment

Where wastes may be discharged to the environment under conditions stipulated in a licence from an authority (e.g. EPA), any departure from these conditions (e.g. larger quantities, higher frequency of discharge, substances not stipulated, etc) shall be treated as an incident (refer ES&H Guideline [ESH-006](#)) and the appropriate corrective action shall be applied (refer ES&H Guideline [ESH-005](#)). Where required, such instances shall also be reported to the relevant authority.

For requirements related to instruments used for the measurement of discharge of wastes to the environment, refer ES&H Guideline [ESH-060](#).

Where required by the relevant authority (e.g. EPA Victoria), an Annual Return report of PIW shall be submitted to the authority. This shall apply if:

- more than five consignments of PIW were transported off-site in the 12-month reporting period; or
- the Company has been granted an exemption from the use of waste transport certificates, regardless of how many consignments of PIW were sent annually; or
- PIW was disposed of, other than to sewer, at the site.

In jurisdictions where this is applicable (e.g. New Zealand), all or part of discharge permits may be transferred, provided that:

- the transfer is for the site for which the permit is granted;
- a regional plan allows the transfer;
- the transfer does not worsen the actual or potential effect of any discharges on the environment;
- the transfer does not result in any discharges that contravene a national environmental standard;
- the discharge is to water and both sites are in the same catchment;

Managers shall be advised that the dumping of waste (particularly hazardous wastes) in public places or in the stormwater drain, constitutes an offence; that the company may be liable to pay for the clean-up costs and that this amount may be recovered by the authority as a debt.

5. Responsibilities of Personnel

The following personnel shall assume the primary responsibility for the activities covered by this guideline:

- ES&H Manager
- Operations Manager
- Line Managers

- ES&H Specialists
- Personnel involved in waste treatment and disposal

6. Supporting Documents

Work Instructions

Specific work instructions for the disposal of each waste (including Personal Protective Equipment, where applicable).

Forms

Waste Disposal Record Sheets

8.3. Management System Standards

<http://www.saiglobal.com/shop/Script/search.asp>

AS/NZS ISO 9001-2008 Quality Management Systems - Requirements (Sections 7.1, 7.2 and 7.5)

ISO 14001-2004 Environmental Management Systems - Requirements with Guidance for Use (Sections 4.3.1 and 4.4.6)

AS 4581-1999 Management System Integration – Guidance to Business, Government and Community Organizations (Section 7)

AS 4292.1-2006 Rail Safety Management - Part 1: General Requirements (Sections 2 and 6)

<http://www.workcover.vic.gov.au/>

SafetyMAP Auditing Health and Safety Management Systems, 4th Edition – Element 3.10

<http://www.comcare.gov.au>

Comcare National Self Insurer OHS Audit Tool, 2007 – Element 3.10

<http://www.worksafe.vic.gov.au>

NAT National Self Insurer OHS Audit Tool, 2007 – Element 3.10

8.4. Australian and New Zealand Standards

<http://www.saiglobal.com/shop/Script/search.asp> (for Australian standards)

<http://www.standards.co.nz> (for New Zealand standards)

Please Note	Standards which are referenced in legislation (i.e. acts and regulations) are shown in <u>underlined text</u> . In addition, it should be noted that many acts and regulations, in various jurisdictions, contain provisions that certain matters are to be in accordance with the “appropriate Australian Standard” or “relevant Australian standard” without specifically nominating a standard by number or title.
AS 1547-2000	On-site Domestic Wastewater Management (issued July 2000)
<u>AS 1792-1976</u>	<u>Method for determining the biodegradability of surfactants (superseded); referenced in:</u> <u>SA Code of Practice for vessel and facility management (marine and inland waters)</u>
<u>AS 3542-1996</u>	<u>Pleasure boats - Toilet waste collection, holding and transfer systems; referenced in:</u> <u>SA Code of Practice for vessel and facility management (marine and inland waters)</u>
AS 4123.1-2008	Mobile waste containers - Containers with two wheels and a capacity up to 400 L for lifting devices - Dimensions and design (issued June 2008)
AS 4123.2-2008	Mobile waste containers - Containers with four wheels with a capacity from 500 L to 1200 L with flat lid(s), for trunnion and/or lifting devices - Dimensions and design (issued June 2008)
AS 4123.3-2008	Mobile waste containers - Containers with four wheels with a capacity from 770 L to 1300 L with dome lid(s), for trunnion and/or lifting devices - Dimensions and design (issued June 2008)
AS 4123.4-2008	Mobile waste containers - Containers with four wheels with a capacity from 750 L to 1700 L with flat lid(s), for wide trunnion or BG and/or wide comb lifting devices - Dimensions and design (issued June 2008)
AS 4123.5-2008	Mobile waste containers - Performance requirements and test methods (issued June 2008)
AS 4123.6-2006	Mobile waste containers - Health, safety and environment (issued August 2006)
AS 4123.7-2006	Mobile waste containers - Colours, markings, and designation requirements (issued August 2006) (amendment 1 issued August 2008)
AS/NZS 4401:2006	Plastics piping systems for soil and waste discharge (low and high temperature) inside buildings - Polyethylene (PE) (issued March 2006)
AS 4494-1998	Discharge of Commercial and Industrial Liquid Waste to Sewer – General Performance Requirements (issued January 1998)
<u>AS 4736-2006</u>	<u>Biodegradable plastics - Biodegradable plastics suitable for composting and other microbial treatment (amendment 1 issued October 2009); referenced in:</u> <u>SA Plastic Shopping Bags (Waste Avoidance) Act 2008</u>
<u>AS 4939-2001</u>	<u>Non-reusable Personal use Containers for the Collection and Disposal of Hypodermic Needles and Syringes (issued August 2001); referenced in:</u> <u>SA Environment Protection (Waste to Resources) Policy 2010</u>

<u>AS 4976-2008</u>	<u>The removal and disposal of underground petroleum storage tanks (issued February 2008) ; referenced in: WA Storage and Handling of Dangerous Goods Code of Practice 2008</u>
HB 203-2006	Environmental Risk Management - Principles and Process (issued February 2006)
<u>NZS 4304:2002</u>	Management of Healthcare Waste; referenced in: Industry Code of Practice for the Management of Clinical and Related Wastes, 5th edition, 2007, which is referenced by the SA Environment Protection (Waste to Resources) Policy 2010

8.5. International Standards

<http://www.iso.ch/iso/en/ISOOnline.frontpage>

<http://www.saiglobal.com/shop/Script/search.asp>

ISO 5667-1:1980	Water Quality - Sampling - Part 1: Guidance on the Design of Sampling Programmes (Corrigendum 1 Issued 1996)
ISO 5667-2:1991	Water Quality - Sampling - Part 2: Guidance on Sampling Techniques
ISO 5667-3:1994	Water Quality - Sampling - Part 3: Guidance on the Preservation And Handling of Samples
ISO 5667-4:1987	Water Quality - Sampling - Part 4: Guidance on Sampling from Lakes, Natural and Man-Made
ISO 5667-5:1991	Water Quality - Sampling - Part 5: Guidance on Sampling of Drinking Water and Water Used for Food and Beverage Processing
ISO 5667-6:1990	Water Quality - Sampling - Part 6: Guidance on Sampling of Rivers And Streams
ISO 5667-7:1993	Water Quality - Sampling - Part 7: Guidance on Sampling of Water And Steam In Boiler Plants
ISO 5667-8:1993	Water Quality - Sampling - Part 8: Guidance on the Sampling of Wet Deposition
ISO 5667-9:1992	Water Quality - Sampling - Part 9: Guidance on Sampling from Marine Waters
ISO 5667-10:1992	Water Quality - Sampling - Part 10: Guidance on Sampling of Waste Waters
ISO 5667-11:1993	Water Quality - Sampling - Part 11: Guidance on Sampling of Groundwaters
ISO 5667-12:1995	Water Quality - Sampling - Part 12: Guidance on Sampling of Bottom Sediments
ISO 5667-13:1997	Water Quality - Sampling - Part 13: Guidance on Sampling of Sludges from Sewage and Water- Treatment Works
ISO 5667-14:1998	Water Quality - Sampling - Part 14: Guidance on Quality Assurance of Environmental Water Sampling And Handling
ISO 5667-15:1999	Water Quality - Sampling - Part 15: Guidance on Preservation And Handling of Sludge And Sediment Samples
ISO 5667-16:1998	Water Quality - Sampling - Part 16: Guidance on Biotesting of Samples
ISO 5667-17:2000	Water Quality - Sampling - Part 17: Guidance on Sampling of Suspended Sediments
ISO 5667-18:2001	Water Quality - Sampling - Part 18: Guidance on Sampling of Groundwater at Contaminated Sites

ISO 6961:1982	Long-Term Leach Testing of Solidified Radioactive Waste Forms
ISO 6962:1982	Standard Method for Testing the Long Term Alpha Irradiation Stability of Solidified High-Level Radioactive Waste Forms
ISO 7675:2003	Plastics piping systems for soil and waste discharge (low and high temperature) inside buildings - Chlorinated poly (vinyl chloride) (PVC-C)
ISO 11932:1996	Activity Measurements of Solid Materials Considered for Recycling, Re-Use or Disposal as Non-Radioactive Waste
ISO 17088:2008	Specifications for compostable plastics
ISO 20079:2005	Water quality - Determination of the toxic effect of water constituents and waste water on duckweed (Lemna minor) - Duckweed growth inhibition test
